

Project-ZERO

The initial plans of long-term goals & most importantly, survival in this mess of evolution on planet-Earth.

- Survival, Evolve or Die.
- Aim, learn a skill remembering the ultimate aim.
- Space, The Final Frontier...

Survival

It means that, you have to be strong physically & mentally. Remember why are you here, what's your ultimate aim!

- Exercise- workout, swimming, fighting & everything necessary.
- Computer Science, **Skills & Work**.
- Overview of science, quantum to universal, all of it.

Aim

What a wonder, there isn't one. As far as you'll go, you'll find nothing and just nothing. Even the existence of the whole universe & life doesn't make any sense. If you really want something, go get it. Nothing's impossible...

- Working on the **Project-CortanaAI**.
- Working with SpaceX, Rocket Lab & NASA like organizations.
- Ultimate development of a **Spacefaring Civilization**...

Space Exploration

Afterall It's the only thing that matters. [Space, The Final Frontier](#).

- “Life looks for life”.
- It'll not be us who will reach the Alpha Centauri or other near stars. It'll be a [species](#) much like us with more of our strength & fewer of our weaknesses. A part of something bigger.
- We humans, trying to understand this universe like, this [universe](#) trying to understand itself.
- Here I stand, A universe of atoms and an atom in the universe. Wondering about the existence itself, and what could be more important than finding the truth about my own [existence](#) itself.

My Dream*

I would like to set sail for deep space with my Starship & (with my Stargirl, If any?). I wonder, what I might found there & even if there isn't. It's worth the shot. I mean, what else matters?

- I think that, “It's not about living forever, it's about living with yourself forever”.
- I want to inspire the next generation of humanity for [Space Exploration](#) by the work I'll do.

.
