Project-CortanaAI

This is Project-CortanaAI. It's a dream of mine inspired from Sci-Fi movies but, mostly by Halo Infinite. I think that, it could change the way humans interact with computational devices. You can interact with it through Metahumans (Voice, Visual, Hologram, Traditional Input methods, etc.) It should must work with most of the computational devices out there at Earth & It's not limited to the planet-Earth only, it'll work on Spacecrafts and Starships also.

- As the development begins, the first focus will be just to make it work on any system.

- It's here to assist humans towards what's really important to humanity, Innovation in Technologies & Space Exploration.

- This should really feel like you're living in the world of tomorrow. So that, you can work towards what's beyond that!

CortanaAI (Version-0.1)

It's the very initial blueprint for this project. Let's see how it goes...

- ➢ Hardware Type - Not Specified
- ➢ Software Type - Not Specified
- ➢ Operating System:
    - Windows 11
    - Linux Systems

- ➢ Programming Languages:
    - ♦ Python3
    - ♦ C++20
    - ♦ Shell - pwsh, bash, etc.

- ➢ Computation Technologies:
    - Software Development
    - AI & ML Engineering
    - Web Technologies
    - System Administration

- ➢ CortanaAI Dependencies:
    - A voice engine
    - Voice / Speech engine
    - Unreal Engine 5
    - Computational Systems & Controls

CortanaAI Roadmap

- ❖ Level-ZERO (Version-0.x)
    - ▪ Artificial Narrow Intelligence (ANI)
    - ▪ A weak AI, specific jobs

- ❖ Level-ONE (Version-1.x)
    - ▪ Artificial General Intelligence (AGI)
    - ▪ An enhanced AI, Normal jobs

- ❖ Level-TWO (Version-2.x)
    - ▪ Artificial Superintelligence (ASI)
    - ▪ A true AI, ready to uncover secrets of the universe, ready to improve quality of the life, A true assistant.

Current State of CortanaAI

- Level-ZERO (Version-0.x)
- Dated: 12022.04.12.20:16

★ Sam Skywalker, Starboy
